## Biology: Marine Biology

---

### Background

My name is Elyse Andrejcisk. I am pursuing a marine biology major with a minor in hospitality.

I chose USCB due to the class sizes and the area. I like how the school is close to the beach and Hilton Head has a lot of opportunities for both my degrees. The class sizes are amazing because they aren't so big that you are a number to your teacher. At USCB, the teachers take pride in helping their students excel.

I chose to major in marine biology because I was always fascinated with marine life growing up. I hope that choosing this major will help me make a difference in the world while doing something I love.

Fort Mill, South Carolina

### Favorite Class

My favorite class that I have taken at USCB is Oceanography and Cell and Molecular Biology Lab. I love the hands-on activities that both courses provide. I also love learning different things outside of my concentration. My hospitality classes, like Cruise Line Management, were great classes. These were by far some of my favorite classes that I have taken during my journey at USCB.

### Best Piece of Advice

One piece of advice I would give a new student is that it is okay to change majors. You should do what makes you happy and what you see yourself thriving in.

### Fun Fact:

I love paddle boarding and just indulging in nature. I can usually be found at the beach. I love taking yoga and painting classes either on campus or off-campus.
